## EXPERIENCE

### Senior Software Engineer

Alokin Software Pvt. Ltd. (2017 - Present)

#### 2020 - Present

Working as a Front-end developer and a Team lead on migrating projects done on **Django** to **Nuxt.js** and **Vue.js**. Websites with SEO impact are migrated to Nuxt.js to make use of Server Side Rendering. Worked along with the client-side team to provide solutions and architect new features on the migrated product with an emphasis on **performance** and **Web Vitals** score.

#### 2017 - 2020

Worked as a full-stack developer on various websites created using the **Django** and **Mootools** framework. Tasks during this period included building web pages according to design. Develop the responsive front-end using **HTML** and **CSS**

Worked as a back-end developer to create APIs, using **Starlette** framework, required to migrate an existing project to Nuxt.js

## PROJECTS

### StorageFront

An E-commerce site that allows users to search and find self-storage facilities in the US and Canada.

**Tools used:** Django, LESS, Mootools, jQuery Mobile, MySQL

**Role:** Fullstack developer

### White Label Sites

A white label site is a web product based on Storagefront, that allows an owner to list their self-storage facilities, customise the look and feel of the website to match their branding. It allows users to search for facilities, reserve and rent those units, pay the bill, enrol in auto pay and manage their account.

**Tools used:** Django, HTML, LESS, Mootools, jQuery Mobile, MySQL

**Role:** Fullstack developer

### Glenn Llopis

GLLG is a nationally recognized workforce development and change management consulting firm that drive business growth by developing leaders and teams focused on inclusion and the power of individuality. GLLG Assessments and Quizzes

**Tools used:** Django, HTML, LESS, Mootools, MySQL

**Role:** Fullstack developer

### Kiosk

A touch screen interface placed in-store, that allows users or store managers to easily reserve, rent and pay the bills.

**Tools used:** Vue.js, HTML, LESS

**Role:** Frontend developer

### Mariposa

White label websites migrated from Django to a new stack using Nuxt.js. The project also consists of an admin, kiosk, digital signage used by the facility owners

**Tools used:** Nuxt.js, Bootstrap Vue, Vue.js, HTML, LESS

**Role:** Team Lead, Frontend developer
